

# ?? What To Do ??

## When the Forecast Says it May Rain and There is a Scheduled Event

Step 1 >> Relax and Hope for the Best

### Hello Leveridge Friends,

We all know in New England the Weather Forecasts and what “actually happens” can and does change. We also know we can all miss a lot of good things in life if we hunker down inside when the forecast says rain.,, Sadly - All of us have done this and missed out on quality days outdoors when the forecasts were wrong...

### Those of us running events are always there at 8am rain or shine.

This is so if anyone that travels to NFGA (even if it's pouring) doesn't show up to a locked gate and nobody there.

If it isn't raining by or near published event start time, we set up for whoever showed up to shoot.  
If the radar is showing the rain moving out or not going to hit us we may just do a delayed start of the match.  
If a shower moves thru, we go under cover while it passes with fun conversations then resume shooting.  
If it looks like 50 / 50 +/- rain may move in we may squad and start the event but not collect fees until the end.  
(\*In this case - If we start but don't get to complete the event it is considered as a free practice)

### If you are planning or contemplating on attending,

I suggest you get up early and check your Favorite **Radar App** and make your decision to head to the range or not. E Mails / E Blasts likely will not be sent as there is no way I can successfully reach everybody that may attend. Our Favorite **LIVE / REAL TIME Radar Apps** for Smart Phone / Tablet are: **Rainy Days** and **My Radar**

### EXCEPTION For >>> State Championships, Regionals and EIC Events:

For these events I will update the NFGA Online Calendar at <https://nfga.org/club-calendar/>  
There I will state if we are rescheduling or not as early as possible and update there up to night before the event.

### Every attempt will be made to re-schedule rained out events

For Updates Watch the Leveridge and NE Combined Schedules @ <https://nfga.org/high-power-rifle/>  
And the NFGA Online Calendar @ <https://nfga.org/club-calendar/>

Here's to Hoping for Good Weather on All Scheduled Events Days

If not you all know where the Leveridge schedule is for the rest of the season >>> <https://nfga.org/high-power-rifle/>

Thanks All,

George Smith

Leveridge Governor
